Re: Information Request Pursuant to Section 308 of the Clean Water Act
Analytical Sample Results

Dear Ms. Mitchell,

In accordance with the Information Request pursuant to Section 308 of the Clean Water Act dated October 6, 2009, Dalton Utilities is submitting the final analytical results received for the sampling conducted as outlined in Dalton Utilities Private Drinking Water Well Monitoring Report. The results are contained in Attachment A which is provided herein as a bound report titled Test America Laboratories, Inc. Analytical Report on Perfluorocarbon (PFC) Analysis Job # 280-3824-1 which contains 758 pages.

As noted in the aforementioned 308 letter, Dalton Utilities Private Drinking Water Well Monitoring Report, and Dalton Utilities correspondence to you dated April 30, 2010, the attached analytical report is for the final sampling of these private drinking water wells with the exception of one location.

As indicated in the attached report, one sample had several internal laboratory standard recoveries that were outside of the laboratory's acceptable range. As such, the sample results for the private well located at 705 Peek Road are not consistent with the analytical results previously reported for this location. Due to this abnormality, this location was re-sampled and the final analytical report for this re-sample will be submitted to you as appropriate after receipt.

If you have any questions, please contact me at 706-529-1091 or dcope@dutil.com.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted.
